MD5
evidence you can trust

VFC LAB

"The product is getting better by the day and is one of our main tools" - a digital forensic analyst in the UK

THE GO TO VIRTUALISATION TOOL FOR:

- **Cyber Security**
- **Digital Forensics**
- **Incident Response**

VFC Lab gives a new dynamic to the way an investigator works on an investigation.

VFC lets the investigator quickly experience the computer environment just like the original user.

VFC puts the investigator "in the room", providing invaluable access to software and data that cannot be easily found with a typical "dead box" examination
